

Master's Thesis

If you decide to register your Master's thesis, please note that you must have achieved at least **72 credit points**. The registration process is as follows:

Assignment of topics for the Master's Thesis

- You choose your topic and look for a supervisor. These can be professors, junior professors or private lecturers from the relevant subject area at the Faculty of Digital Engineering.
- You discuss the topic and finalize the title of the thesis.
- You find a second assessor in consultation with the supervisor.
 - In addition to the group of supervisors, second assessor can also be a senior researcher at HPI.
 - The second assessor should belong to a different research group than your supervisor.
 - External independent examiners with a doctorate (if they have the academic qualifications) can also be admitted as second assessors. To this effect an application must be sent to the Examination Board (PruefungsausschussDE@hpi.uni-potsdam.de). The application must be justified.
- You request the Master's thesis registration form from the Office of Student Affairs (studentaffairs@hpi.de).
- Fill out the form and sign it to confirm your intention to register for the Master's thesis.
- Please also give the registration form to your supervising professor to sign.

Registration of the Master's Thesis

- Please submit the registration form to the Student Affairs Office within 14 days.
- The Student Affairs Office will then send a confirmation of your Master's thesis by email, including the submission deadlines.

Submission of the Master's Thesis

- Please upload your Master's thesis as a PDF file via Moodle.
- Please check your thesis carefully before uploading it to Moodle and ensure that you are uploading the correct version. The Student Affairs Office can only consider and forward to your examiners the version of your thesis that was uploaded first. Updated versions of your Master's thesis that you upload to Moodle at a later date will not be forwarded to your examiners.
- There is no need to attach a declaration of originality. When submitting via Moodle, you indicate the originality of your work by ticking a box in the Moodle course.

Please note:

If the submission deadline falls on a Saturday, Sunday or a public holiday (state of Brandenburg), the work can be submitted on the next working day.

Assessment of the Master's Thesis and Defense

The Office of Student Affairs forwards your Master's thesis to the reviewers for assessment. The reviewers assess the thesis and give reasons for their grades.

Please contact your reviewers in good time to schedule your defense.
